“Il desiderio di leggerezza e comfort all’interno di spazi sempre più complessi è dovuto dal momento in cui viviamo, in continua e crescente accelerazione.

La qualità dello spazio in cui ci troviamo influisce su ogni cosa, ci teniamo che al loro interno, materiali e forme unendosi ci facciano stare bene e offrano autenticità, affetto e ispirazione.”

“In equilibrio tra design e comfort oggi le aree lounge, le lobby degli hotel, le sale d’attesa, i meeting point, sono spazi soft e progettati seguendo il concetto di break out area, per accoglierci in relax fra un impegno e l’altro: che si tratti di lavoro, di vita sociale, a volte sono più confortevoli persino del nostro salotto di casa.”

“Delicately balancing design and comfort, today’s lounges and lobbies, waiting and meeting points, have become soft spaces, designed along the lines of breakout areas, to welcome us in relaxation between one commitment and another: whether for work or as part of our social life, sometimes they have even become more comfortable than our own living rooms.”
